Tulip Table Top - Round Marble

The Rove Concepts Saarinen Tulip Table series were inspired by mid-century Finnish architect and designer Eero Saarinen. He was driven to streamline tables and chairs to maximize space by eliminating unnecessary parts like support legs. Instead, Saarinen utilized modern technology to create a stable single base that could support a heavy table top without wobbling. These reproductions stay true to this idea and design.

In addition to their practicality, these pieces feature genuine Cararra marble sourced exclusively from Cararra quarries in Italy. This marble is highly valuable due to its durability and beauty. In fact, Michelangelo sculpted his masterpiece, David, from it. Rove Concepts' commitment to using naturally sourced marble guarantees that each table is unique. The tables also take advantage of materials like aluminum and modern sealants. The table tops have a protective coating applied and the bases undergo a 5-step powder coating on the aluminum base to prevent damage and increase durability.

These tables can fit into the interior of any home, though they are most striking when combined with the Rove Concepts Tulip Chairs. They are now even more adaptable, as they come in different sizes and available in White Cararra Marble and Black Granite. The iconic Rove Concepts Tulip Tables are representative of organic beauty in the modern world.

Details

The Tulip Table, made of natural Italian Carrara marble, is simply beautiful. Available in various sizes, this impressive table will suit any space from a modern apartment to a large family home.

This Rove Concepts premium reproduction features:

- Imported from the Carrara province of Tuscany, the white Carrara marble is considered the best in the world for its natural look and durability
- Natural grey veining throughout - not solid white (Please see actual pictures above)
- Table top also available in Black Granite
- Solid stone table top is polished and finished with two layers of sealant
- Table top shape: ROUND
- True to the original, the edge is smooth and beveled on the underside
- The base is made of cast aluminum and undergoes a 5-step powder coating process for a smooth finish that is resistant to chipping
- Available with a white or black base
