Rove Classics

Tulip Table Top - Round Lacquer

Eero Saarinen™s Tulip collection, consisting of a variety of tables and chairs, was an exercise in form that produced some of the most recognizable shapes in modern furniture design. The single stem eliminated Saarinen™s concern over the œslum of legs• that he considered many of the tables and chairs of his time to have.

This sculptured, organic design has been realized from a number of different materials over the last 50 years or so as technologies have changed, culminating in this aesthetically exact reproduction made from marble and glossy fiberglass. With its iconic stem resembling both the tulip and a wineglass, this luxurious unified piece inspires a sense of romance and class.

Available in a variety of sizes, Saarinen™s Tulip Table is able to adapt to any environment. Particularly when combined with Saarinen™s Tulip Chair, the Tulip table creates a clean, unified space in any home or office.
