ROVECONCEPTS

Tulip Table Top - Oval Lacquer

The Rove Concepts Saarinen Tulip Table series were inspired by mid-century Finnish architect and designer Eero Saarinen. He was driven to streamline tables and chairs to maximize space by eliminating unnecessary parts like support legs. Instead, Saarinen utilized modern technology to create a stable single base that could support a heavy table top without wobbling. These reproductions stay true to this idea and design. Rove has now introduced wooden veneer table tops in order to better adapt to every interior and preference.

In addition to their practicality, the Rove series features American walnut timber or white oak natural timber. These First and Seconds (FAS) grade American timber that are exclusively sourced from the United States. The commitment to using naturally sourced wood guarantees that each table is unique. The tables also take advantage of materials like aluminum. The bases undergo a 5-step powder coating on the glossy aluminum base to prevent damage and are available in white and black.

These tables can fit into the interior of any home, though they are most striking when combined with the Rove Concepts Tulip Chairs. They are adaptable as they are available in different sizes. The iconic Rove Concepts Tulip Tables are representative of organic beauty in the modern world.

Details
